Client Information

DocuMentor

DocuMentor serves at-home healthcare providers with scheduling and billing. Customers are small businesses located, at present, in Indiana. These small businesses employ caregivers who visit clients and perform healthcare, rehabilitation, errands, and other services.

Mentor Feedback

Mid Iteration Meeting

- Use the API to sync the data back to the database after re-connecting to internet.
- Talked about maybe rolling the styles to next iteration if not done.
- How can we contact DocuMentor team about their API structure.

Final Iteration Meeting

- He was impressed with the new page style.
- How to get testing completely done.
- Potential improvement with client dropdown.

Client Feedback

Final Iteration Meeting

- Our client did not have much feedback to give other than he was happy with the way it looks.
- He also asked us about our confidence level for future iterations.

Feature 1: Task List Dropdown

- If the caregiver does not have internet access, the system shall display their list of tasks for their patient and allow them to mark them complete.

15 - Toilet - Bathroom

16 - Toilet - Bedside Commode

17 - Toilet - Urinal/Bedpan

18 - Toilet - Incontinence

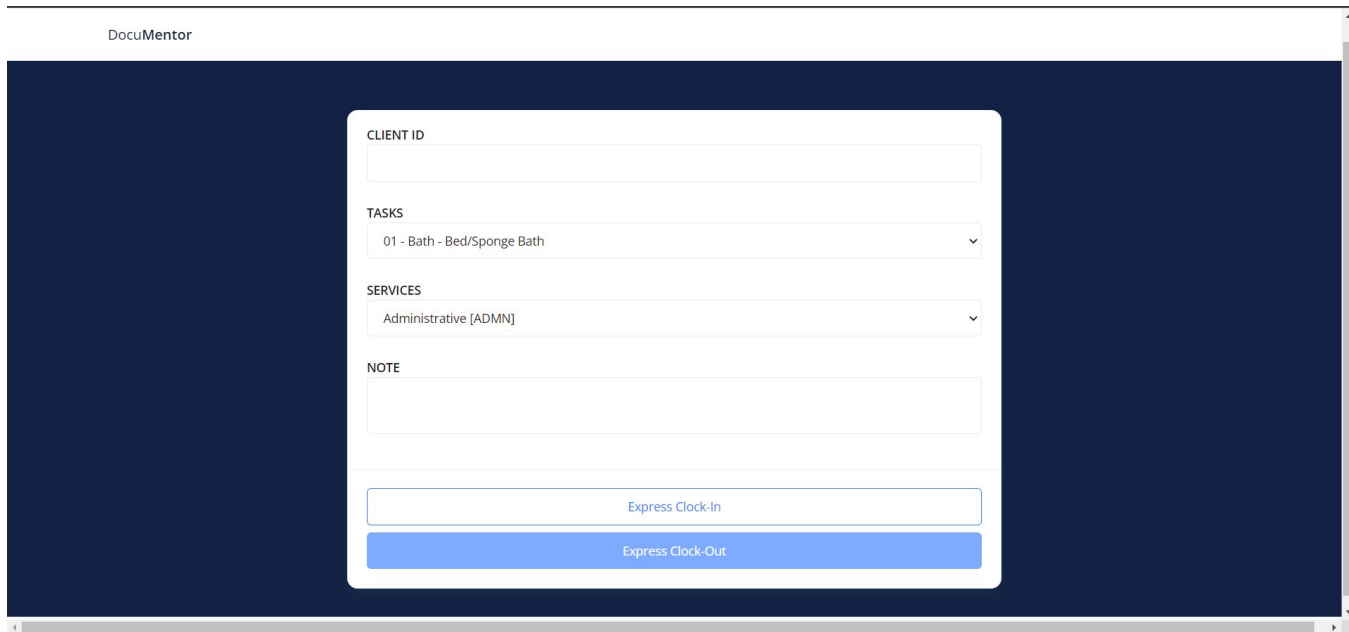

19 - recreational

20 - Completed

Feature 2: New Styles

- The application must look like the pre-existing web app.

The screenshot displays the DocuMentor web application interface. The page has a dark blue background. A white form is centered on the page, containing the following elements:

- CLIENT ID**: A text input field.
- TASKS**: A dropdown menu with the selected option "01 - Bath - Bed/Sponge Bath".
- SERVICES**: A dropdown menu with the selected option "Administrative [ADMN]".
- NOTE**: A text input field.
- Buttons**: Two buttons at the bottom of the form. The top button is white with a blue border and text "Express Clock-In". The bottom button is solid blue with white text "Express Clock-Out".

The browser's address bar at the top shows "DocuMentor".

Feature 3: Sync to Database

- Data (client id, service id, clock in time, and clock out time) is synced back to documentor database once connection is reestablished.

Planned Iteration 3 Features

Feature 1: UI should look the same online and offline

Feature 2: Client list dropdown

Feature 3: Task drop down allows for the user to select multiple tasks.

Feature 4: Check if user regains internet connection

Something Interesting
